Welcome to the first year-end summary for the Village of Bellevue Community Development Department. This past year was an exciting year for the Village of Bellevue as we saw many high profile projects take shape and submissions for many more that are set to begin to take shape in 2017.

This document is intended to provide a quick snapshot of key facts and figures measuring what has taken place the previous development calendar year as well as a historical snapshot to show trends in development.

Also included is a brief summary of the Business Retention efforts the Village has undertaken over the past two years. This is a key program to create meaningful connections between the Village and the businesses that make up a large part of our community.

Andrew J. Vissers, Community Development Director
NEW BUSINESSES OPEN IN BELLEVUE 2016

The Village celebrated many new business openings in 2016. From Buffalos Wild Wings, Cellcom, Fastest Labs, GB Area Family Dental, Turning Point Chiropractic and many more.

Business Retention Visits

Over the past two years the Village has expanded our frequency of Business Retention and Expansion visits. This is an opportunity for both the business and the Village to have a more engaging conversation on possible business needs and what we can do to help. If you would be interested in participating in this process, please go to our website and fill out an initial BR&E Survey and once submitted a staff member will be in contact with you to set up an appointment that is convenient to you. This is a great way for the Village to get a clear understanding of the important issues that Bellevue businesses have.
